Education

UIET, Panjab University
Bachelor of Engineering in ECE

May 2025
Chandigarh, India

Experience

Reliafin Inc.

March 2024 - June 2024

Founding Engineer

Remote - USA

- Used **Django Rest Framework** to build the backend system for handling **AI specific requests** with complete user authentication and **AWS** integration.
- Designed and Implemented the **RAG pipelines**, using **langchain** for consumers to **chat with advisors**.
- **Researching for AI projects**, to be executed in the future, including but not limited to **reading research papers**, technical documentations and **writing SOPs**.

Projects

- **hit.rails - Develop Guardrails using user data to protect your User-Facing LLM Apps**
Next.js, Supabase, LLMs, Anthropic, Retrieval Augmented Generation, API
 - **Project Link:** major-guardrails.hiteshbandhu.xyz
 - A platform for securing AI systems by protecting against malicious input and unsafe output.
 - Provides customizable APIs, real-time monitoring, and compliance tools to ensure enterprise-grade safety for user-facing LLM apps.
 - Designed to prevent exploitation, optimize costs, and build trust in AI workflows.
- **hack.forge - Generate and Deploy websites for your small business under 58 seconds**
Next.js, Express.js, AI, LLMs, RAG, AI Agents, Langchain.js
 - **Project Link:** forge.wetrsm.co
 - Simplifies building professional websites with AI.
 - Features include live previews, multi-page support, and custom domain integration.
 - A flexible, credit-based platform tailored for individuals and businesses to ensure ease and scalability.
- **wetrsm.co - My Small AI Studio**
Next.js, Shadcn UI, ReactJS
 - **Project Link:** wetrsm.co
 - A small AI studio specializing in creating content pipelines, building guardrail frameworks for AI applications, and offering consulting services.
 - Helps businesses integrate AI into their workflows with a focus on data privacy and compliance.
- **Professional Portfolio (currently building)**
React.js, HTML, CSS, Shadcn UI
 - **Project Link:** hiteshbandhu.xyz
 - A personal professional portfolio showcasing my projects, skills, and expertise.

Technical Skills

Languages: Python, C, C++, JavaScript

Technologies: Django, Flask, Django REST Framework, Numpy, Pandas, Matplotlib, Streamlit (Python); Next.js (JavaScript);

Databases: PostgreSQL, MongoDB, Supabase, Pinecone (Vector Database)

GenAI Stack: Langchain, LangGraph, RAGAS Evaluations, PromptLayer, OpenAI API, Whisper API, Google Gemini API, HuggingFace, MonsterAPI, ClaudeAI, Prompt Engineering
